KS18-S ULTRA FAST SURFACE/IMMERSION PROBE TYPE 'K' NARROW SHIELD

RIBBON SURFACE/IMMERSION PROBE - Type 'K'

Description

This probe uses the straight handle for fine control and designed for both surface and immersion temperature measurement. The probe is manufactured with *ThermaSprint* Technology producing an ultra-fast response time.

NOTE: This probe only requires light pressure to give a true reading and is suitable for smooth, clean surfaces. If used on an uneven surface, there is a risk that the band will be weakened and deformed.

Construction

Ribbon band thermocouple sensor and draught shield 110mm long x 7.5mm diameter: Stainless Steel 316 (Food Grade) Sealed with Silicon Rubber compound to ensure the probe is fully waterproof. 2M curly polyurethane cable with moulded connector.

Sensor Features

> POLYPROPYLENE HANDLES

Polypropylene is an extremely tough and durable material, commonly used for milk crates, it has good low temperature performance and a relatively high melt temperature. It performs exceptionally well under chemical attack.

> TOTAL ENCAPSULATION TECHNIQUE FOR MAXIMUM STRENGTH AND DURABILITY.

This results in a solid handle as opposed to a hollow handle. This is particularly important as there is often damage to the handles caused by excess heat. With a hollow handle it is possible to puncture the outer plastic and damage the sensor irreparably.

> ThermaSprint Technology

Producing an unparalleled response time of just 2 seconds

> WATERPROOF CONSTRUCTION THROUGHOUT

Due to the total encapsulation method used, the probe is fully waterproof.

> TOUGH POLYURETHANE CABLE

- Polyurethane cables are used in place of the standard PVC for the following reasons :-
- Greater retractability
- Enhanced memory of its curl
- Non-Toxic
- Greater mechanical strength for durability
- 12 X 0.2mm wires used internally for greater strength.
- PTFE inner insulation for strength and retractability.

> HIGH ACCURACY THERMOCOUPLE MATERIAL THROUGHOUT

Type 'K' Thermocouple: Class I (±1.5°C ±0.25%)

≻	WIDE AMBIENT TEMPERATURE SPECIFICATION		: -30 TO 50 °C
≻	TIME RESPONSE	(96% of value on clean metal)	: 2 Secs
≻	MEASUREMENT RANGE		: -50 TO 80 °C
